EDUCATION

North Carolina A&T State University, *College of Engineering*

Greensboro, NC

Bachelor of Science, Computer Science | GPA: **3.87**

Expected Graduation: May 2028

Organizations: National Society of Black Engineers (NSBE), Association for Computing Machinery (ACM), Google Developer Group (GDG), D.R.E.A.M.S Collective

Honors: Alpha Lambda Delta National Honor Society; Chancellor's List (4/4 semesters)

Scholarships: Texas Instruments Scholarship, Aggie Excellence Scholarship, Aggie Promise Scholarship

Relevant Courses: Computer Program Design, Data Structures, Database Design, Operating Systems, Programming Languages, Internet Systems

Leadership: Eagle Scout, Boy Scouts of America (2023) — led a team of 15 scouts to complete a community service project totaling 170 volunteer hours

EXPERIENCE

Aflac | *Software Engineering Intern* |

June 2026 – August 2026

- Cut new-agent onboarding time from 2 weeks to an estimated 3 days, an 80% reduction, by co-developing the PAS Quote App with two fellow engineers to digitize the manual enrollment process.
- Cut average quote-lookup/resolution time by 70% by building admin dashboards, searchable logs, and quote-lookup functionality used by 10+ internal agents and admins.
- Surfaced 10 critical edge cases before launch by generating 4000+ synthetic data records for stress-testing, improving system stability and reducing post-launch bugs by an estimated 25%.
- Revised 6 app screens across 5 feedback sessions by presenting iterative prototypes and incorporating direct feedback.

PROJECTS

ChevConnect - Job Match | *Java, Node.js, Tailwind CSS, HTML, OpenAI, Netlify* |

March 2025

- Won 1st place among 15+ competing teams by building the backend for an AI-powered job-matching platform in a 24-hour hackathon, achieving 95% accuracy in real-time candidate skill-gap analysis for open Chevron roles.
- Increased dashboard usability for non-technical recruiters by translating complex AI outputs into a clear, user-friendly interface, refined across 3 rapid feedback rounds with a 4-person team to surface each candidate's top 3 skill gaps.

Grainger Website - Sustainability Products | *C++, CSS, JavaScript, React, Netlify* |

October 2025

- Won 1st place among 15+ competing teams by architecting backend algorithms that generated weighted sustainability scores across 10,000+ product data points, cutting manual procurement research time by an estimated 60%.
- Enabled real-time, dynamic filtering across 10+ sustainability metrics for procurement users by synchronizing backend scoring logic with the React frontend through pair programming with a 4-person team.

SKILLS

Languages: Python, Java, C++, C#, SQL, HTML, JavaScript, TypeScript | **Frameworks:** React, Node.js, .NET

Developer Tools: Git, GitHub, Visual Studio, VS Code, Netlify, Vercel, Arduino IDE, IntelliJ, Pycharm, CLion
